

BOB BANNERMAN

RECOMMENDS YOU SERVICE YOUR TRANSMISSION

- **Your transmission is made up of hundreds of parts that must operate together with precision to ensure optimum performance and timing.**
- **The transmission delivers the power from the engine to the wheels of your vehicle.**
- **It is subject to pressure, friction and debris. Build up of debris could lead to poor performance and failure of your transmission.**

Having your transmission serviced will include:

- **Removing the transmission pan, checking and cleaning metal deposits and other debris.**
- **Removing and replacing transmission fluid, filter and gasket with manufacturer approved parts.**

Maintenance intervals will vary depending on model year, engine and type of use. Please review with your Service Advisor to determine your interval requirements.
